

Employment Opportunity – Urban Forestry Technician

B.A. Blackwell and Associates Ltd. is a North Vancouver based resource management consulting firm that was formed in 1988. Our firm provides consulting services to a wide variety of clients by combining expertise in vegetation and forest management, community wildfire protection planning, ecology, urban forestry, forest health, silviculture and research.

Due to expanding opportunities and the need to maintain timely and quality services, we are looking to increase our urban forest management capacity. We are seeking a highly motivated, urban forest technician to join our urban forestry section. As a key member of our group, the selected individual will be involved in projects relating to the management of natural resources in urban and peri-urban environments.

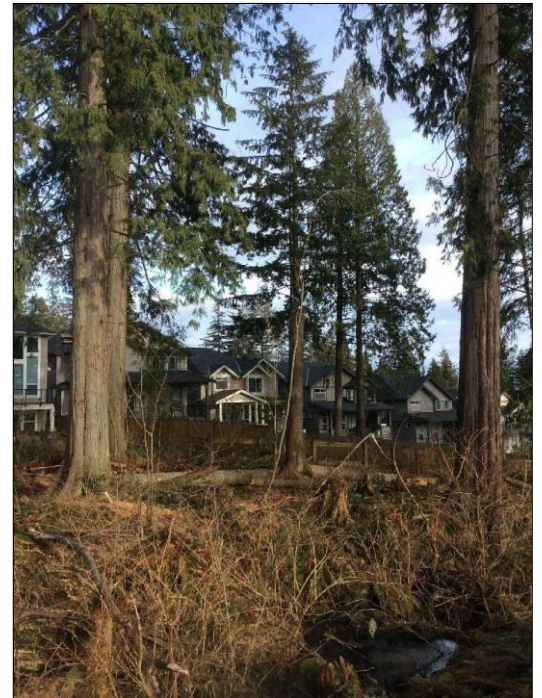

Required Qualifications:

- Degree or diploma in forestry/natural resources, arboriculture or landscape architecture;
- Knowledge of and proficiency with MS Word and Excel;
- Excellent written and oral communication skills;
- A strong work ethic, schedule flexibility, team player, and a desire to develop and learn; and
- Valid class 5 BC driver's license.

Applicants with some but not all of the preferred qualifications are encouraged to apply.

Preferred Qualifications of the Ideal Candidate:

- Is an ISA certified arborist or is eligible to attain certification within 6 months;
- Experience writing reports, letters and memos for clients, consultants, local government, and external agencies;
- The ability to cultivate and maintain effective client relationships, adapt to emerging issues and adjust workplan accordingly;
- Project management skills and the ability to coordinate projects through all phases from administrative set-up, fieldwork, reporting and mapping, through to post project monitoring and inspection;
- Ability to read and interpret design development and construction drawings, legal topographic surveys, and consultant's reports;
- Field experience related to arboriculture and/or forest management including the collection of single tree, stand, and site attributes;
- Knowledge of and familiarity with ornamental tree and shrub species;
- Familiarity working with ArcMap and the iOS platform for iPads; and
- Experience driving and preferably manual transmission vehicles.

This position is a full time permanent position and is based in North Vancouver. Projects will involve field work and local area travel throughout the Lower Mainland. Salary is commensurate with candidate abilities. If you are interested in joining an exciting forestry consulting company please send a resume and cover letter to: inquiries@bablackwell.com.
